Quick Learner | Critical Thinker | Good Listener

Profile / Summary

I am Inukurthi Chakradhar, a graduate from Panimalar Engineering College in the Department of Electronics and Communication Engineering (ECE). Enthusiastic and quick-learning Engineering graduate with strong expertise in Application Packaging and Intune administration, supported by skills in IoT, RTL Design (Verilog, SystemVerilog), cloud technologies, and PowerShell scripting. Hands-on experience as a Cloud Intern, working on cloud-based deployments, automation, and integration of services. Demonstrates problem-solving, adaptability, and collaboration in fast-paced environments. Dedicated to applying technical knowledge to deliver efficient and innovative solutions while continuously enhancing cloud and enterprise technology expertise.

Education

Panimalar Engineering College
B.E. in Electronics and Communication Engineering (CGPA: 9.04) *2020–2024*

Vowel Junior College
HSC (CGPA: 8.73) *2018–2020*

Vowel Techlan School
SSLC (CGPA: 9.7) *2017–2018*

Projects

Smart Home using IoT:

- Designed and implemented a smart home system integrating IoT devices, electronic interfaces, and wireless communication technologies.
- Enabled remote monitoring and control of household activities such as lighting, security, and appliances from any location.
- Improved home security with features like motion detection, smart locks, and real-time alerts.
- Enhanced energy efficiency through automated scheduling, sensor-based control, and usage analytics.
- Focused on user convenience, safety, and sustainability by leveraging IoT automation protocols.

Earthquake Detection using LoRa:

- Developed a seismic monitoring system leveraging LoRa-enabled sensors to detect and measure ground vibrations.
- Deployed sensors in strategic locations for continuous seismic monitoring.
- Designed a communication pipeline where sensors transmitted data wirelessly to a LoRa gateway for analysis.
- Implemented real-time data processing to generate early warning alerts for earthquakes.
- Improved disaster preparedness with a low-power, long-range, and cost-effective IoT-based solution.

Technical Skills

Programming: HTML, CSS, JavaScript, python, SQL

Operating Systems: Windows, macOS, Linux (Ubuntu, CentOS)

Scripting: Linux, Batch Script, VB, PowerShell

Packaging Tools: Install Shield, Flexera Admin Studio.

Deployment Tools: SCCM, Intune

HDL: Verilog, System Verilog, UVM

Managerial: Problem Solving, Teamwork, Easy Interaction

Internships

Application Packaging Trainee, Sonata Software (Nov 24 – Mar 25):

- Gained knowledge in Intune Device Enrollment and Autopilot for seamless device setup and management.
- Administered application deployment and management using Intune (LOB apps & Microsoft Store apps).
- Monitored deployment status, identified issues, and resolved them efficiently.
- Hands-on experience in Patch Management & Vulnerability Remediation.
- Expertise in Application Packaging/Repackaging with InstallShield, AdminStudio, and App Volumes.
- Hands on experience on Admin Studio Install shield, Manual testing, UAT, VM management and application deployment.
- Solid experience with Windows Installer Technology, MSI package creation and management.
- Created MST transforms for customized installations.
- Automated packaging processes with VBScript & PowerShell.
- Specialized in Silent Installations, automating software installations for enterprise-level application deployment, improving efficiency and reducing user intervention.

Backend Development Intern, Qspiders(MAY 24 - SEP 24):

- Worked on Java backend development with JDBC-based database connectivity.
- Implemented CRUD operations in MySQL and designed optimized SQL queries.
- Gained experience in exception handling, prepared statements, and transaction management.
- Built backend modules to integrate Java applications with MySQL databases.

Key Achievements

- Successfully completed Backend Development Internship – implemented JDBC-based database connectivity and optimized SQL queries.
- Designed and tested IoT and Embedded Systems projects, integrating hardware and software.
- Developed and deployed automation scripts using PowerShell to streamline Intune packaging tasks.
- Contributed to collaborative projects by integrating backend modules with databases, showcasing teamwork.
- Gained practical exposure to RTL design and verification using Verilog and System Verilog.

Hobbies & Interests

- Exploring IoT and embedded systems projects
- Backend coding challenges & database optimization
- Hackathons and coding competitions
- Reading tech blogs and research articles
- Chess and logical problem-solving games
- Traveling and exploring cultures

VOLUNTEERING

- Assisted in organizing college-level technical symposiums, managing coding competitions and IoT workshops.
- Participated in community volunteering activities, including digital literacy programs for school students.

Languages

English, Telugu, Tamil
